

Amendment to the Prospectus for Board Certification in Paediatric Radiology 2015

On the recommendation of the AAAEC, the Board of Management approved to delete the following statement from the Prospectus for Board Certification in Paediatric Radiology 2015 with regard to the Pre Board Certification Assessment (PBCA).

No: 10. Pre Board Certification Assessment (PBCA)

“After three attempts at the PBCA if the trainee is unsuccessful, the trainee will not be eligible to proceed for Board Certification in the subspeciality and will be Board Certified as a General Radiologist. The date of Board Certification will be three years after the final MD Radiology examination.”

The Board further decided that this amendment will be applicable to the trainee who opted for subspecialty training in Paediatric Radiology in January 2016 based on the results of MD (Radiology) examination held in December 2015.
